INTRODUCTION

W. AND ASSOCIATES's group activities started in early 1965. Group activities were focusing on M&E engineering design services. In 1973, W. AND ASSOCIATES ROP. was then established to be consulting firm specializing in Mechanical, Plumbing, Sanitary, Electrical and Telecommunication .

During Thailand's booming economy, W. AND ASSOCIATES Consultants Co., Ltd. and W. AND ASSOCIATES Designs Co., Ltd. were established to cope with the fast-expanding real estate business. W. AND ASSOCIATES engineers had under taken responsibility of numerous projects for various engineering services, both design and construction supervision. Engineering services include electrical power, lighting, fire alarm system, security system, sound system, telephone system, telecommunication system, building automation system, air-conditioning system, ventilation system, smoke control system, vertical transportation, plumbing system, sanitary system, waste treatment system, computer site support system and other related systems for several major buildings and factories in Thailand.

Moreover, in 1996, W. AND ASSOCIATES has been one of companies approved by Department of Energy Development and Promotion (D.E.D.P.) for being registered as a consultant company in energy conservation program initiated by D.E.D.P. W. AND ASSOCIATES, as a registered consultant company, will be auditing the designated buildings and factories, which cover thousands buildings nationwide, to improve building's energy

In 2012 the group has begun the service in Civil/Structural Engineering discipline with all engineering disciplines included in one umbrella, the group now is focusing on providing one-stop, all-in-one engineering service for the client.

MESSAGE FROM PARTNERS

Our company is one of the earliest Thai owned consulting firms specializing in Building System (1965) / Civil and Structural Engineering Designs (2012). From the beginning, our company's philosophy has always been ethical practices with good and practical engineering designs. Our design principles for all of our projects are functionally advanced and economical designs meeting the present and future requirements of our clients, energy saving, ease of operation and maintenance. We will do our utmost to offer the designs which best serve our clients.
